HIDROL HM 100

HIDROL HM 100 is hydraulic oil formulated with high quality mineral oils and a stable system of zinc-based additives. They are intended for lubrication of all types of modern hydraulic and circulation systems, working in conditions of moderate and relatively constant temperature. They have excellent hydrolytic and oxidative stability. They are suitable for lubrication of other industrial equipment that requires oil with good oxidation stability and lubrication such as eg. less loaded gears and bearings.

SPECIFICATIONS

- SRPS ISO 6743-4 (L-HM)/ISO 11158 (L-HM)
- DENISON HF-0/HF-2
- SPERY VICKERS I-286-S
- DIN 51524-2(HLP)
- AFNOR NF E 48-603 (HM)
