

MAPETROL CATALYST CLEANER GASOLINE**Description:**

Mapetrol Catalyst Cleaner Gasoline is designed for use with vehicles equipped with catalytic converters, focuses on tackling the accumulation of carbon residues and deposits. This specialized cleaner effectively purges the entire fuel system, including injectors, valves, and pistons. The outcome is enhanced and optimized combustion, leading to decreased emissions and safeguarding the integrity of the catalytic converter. Catalyst Cleaner also offers protection against the detrimental effects of phosphorus poisoning on catalyst performance.

Benefits:

- Diminishes the release of harmful exhaust fumes
- Effectively purges and diminishes the accumulation of deposits in engines featuring catalytic converters
- Enhances the octane rating of the fuel
- Averts fouling of spark plugs
- Optimizes combustion and boosts overall engine efficiency
- Enhances the efficiency of fuel consumption
- Shields against operational glitches of the catalytic converter
- Reinstates power and performance

Usage:

Suitable for utilization in all gasoline engines (including Gasoline Direct Injection) that are equipped with a catalytic converter.

Instructions:

- Each bottle is suitable for treating a fuel quantity ranging from 40 to 60 liters of gasoline
- Before adding gasoline empty the contents of a bottle into the fuel tank
- It is suggested to employ one bottle after every 5000 km traveled
- If the objective is to meet MOT emission standards, opt for Catalyst Cleaner Premium in a fuel amount of 20 to 30 liters and then try to drive at least 20 to 30 minutes at elevated RPM

Technical specification:

Colour	CLEAR
Smell	CHARACTERISTIC
Flash point [°C]	> 61
Density [g/cm ³]	0.804
