

MAPETROL INJECTOR CLEANER DIESEL**Description:**

Mapetrol Injector Cleaner Diesel proficiently eradicates carbon buildup within injectors, reinstating the injector spray pattern to its prime state. Additionally, it offers lubrication to both the fuel pump and injectors, preventing needles from seizing. It enhances combustion through the utilization of potent cleaning agents alongside a strong cetane improver.

Benefits:

- Eradicates carbon accumulations from injectors, reinstating the ideal spray pattern
- Enhances combustion and elevates the cetane number
- Provides lubrication to the fuel pump and injectors, staving off the possibility of needle seizure
- Diminishes corrosion and wear
- Mitigates engine noise
- Lessens fuel consumption and maintenance costs
- Improves starting performance and eliminates knocking under partial loads
- Reduces emission of hazardous exhaust gases

Usage:

Applicable to all diesel engines, including those equipped with common rail technology, whether turbocharged or not. Designed for operation with both low and standard levels of sulfur in diesel fuels.

Instructions:

- Before adding diesel empty the required contents of a bottle into the fuel tank
- Each bottle is suitable for treating a fuel quantity ranging from 40 to 60 liters of diesel
- It is suggested to employ one bottle after every 2000 km traveled
- For sportive use it is suggested to employ one bottle for each tank filling

Technical specification:

Colour	CLEAR
Smell	CHARACTERISTIC
Flash point [°C]	> 61
Density [g/cm ³]	0.802
