

Technical Data for:**MAPETROL OCTANE BOOSTER GASOLINE****Description:**

Mapetrol Octane Booster Gasoline is engineered to elevate the octane rating of gasoline by 2 - 5 points, thereby enhancing combustion efficiency and preventing engine knock. It also revitalizes power and operational effectiveness while purifying the fuel intake system.

Benefits:

- Elevates the octane rating
- Prevents spark plug fouling, engine knock, valve sticking and exhaust valve seat recession
- Renews performance
- Improves combustion
- Improves fuel economy
- Eliminates rough idling and engine hesitation

Usage:

Suitable for all gasoline engines with injection or carburettor operating on either leaded or unleaded gasoline. No adverse effects on catalytic converters or turbochargers.

Instructions:

- Each bottle is suitable for treating a fuel quantity ranging from 40 to 60 liters of gasoline
- Before adding gasoline empty the contents of a bottle into the fuel tank
- It is suggested to employ one bottle for each tank filling

Technical specification:

Colour	AMBER-BROWN
Smell	CHARACTERISTIC
Flash point [°C]	> 61
Density [g/cm ³]	0.796
